RESEARCH INTERESTS

I investigate unconventional approaches to engineering haptic actuators from the ground up. I build haptic devices that can overlay tactile feedback onto *any number of surfaces* in the environment to achieve “**ubiquitous haptics**”. In my recent work, I have applied this idea to a range of wearable actuators that provide feedback such as vibration, friction modulation, & thermal rendering.

My multidisciplinary background in mechanical engineering, material science, and computer science supports designing and implementing interactive devices from the fundamental mechanics to the end application. I have been privileged to do this work at places like the **University of Chicago, Meta, and KAIST**.

EDUCATION

University of Chicago

2019 – Present

PhD (& MS) in Computer Science

Advisor: Prof. Pedro Lopes, Human Computer Integration Lab

Miami University

2019

MS in Mechanical Engineering

Advisor: Prof. Jeong-Hoi Koo, Smart Materials Lab

Thesis: Application of Electrorheological Fluid for Conveying Realistic Haptic Feedback in Touch Interfaces

Supported by a Graduate Fellowship from NASA and the Ohio Space Grant Consortium

Miami University

2018

BS in Mechanical Engineering, Energy Co-Major

GPA: 3.92/4.00

Summa Cum Laude, Departmental and University Honors

REFEREED CONFERENCE PROCEEDINGS

[C.6] **Stick&Slip: Altering Fingerpad Friction via Liquid Coatings**

Alex Mazursky, Jacob Serfaty, Pedro Lopes

In Proc. ACM CHI 2024, with demo at IEEE Haptics Symposium. To Appear.

[C.5] **ThermalGrasp: Enabling Thermal Feedback even while Grasping and Walking**

Alex Mazursky, Jas Brooks, Beza Desta, Pedro Lopes

In Proc. IEEE VR 2024.

[C.4] **ThermalRouter: Enabling Novices to Design Thermally-Sound Devices**

Alex Mazursky, Borui Li, Shan-Yuan Teng, Dasha Shifrina, Joyce Passananti, Svitlana Midianko, Pedro Lopes

In Proc. ACM UIST 2023.

[C.3] **Physical Touch from a Robot Caregiver: Examining Factors that Shape Patient Experience**

Alex Mazursky, Maddie DeVoe, Sarah Sebo

In Proc. IEEE RO-MAN 2022.

[C.2] **MagnetIO: Passive yet Interactive Soft Haptic Patches Anywhere**

Alex Mazursky, Shan-Yuan Teng, Romain Nith, Pedro Lopes

In Proc. ACM CHI 2021, with demos at CHI and SIGGRAPH Emerging Technologies.

[C.1] **Multiphysics Modeling and Parametric Analysis of an Inductor for Heating Thin Sheet Materials**

Alex Mazursky, Hee-Chang Park, Sung-Hyuk Song, Jeong-Hoi Koo

In Proc. ASME International Mechanical Engineering Congress & Exposition (IMECE) 2018.

HONORS AND AWARDS

Chicago Materials Research Center (MRSEC) SEED Grant, University of Chicago, 2021–2022

\$24,500 grant for “Enabling End-Users to Customize Active Materials using a CAD Assistant,” with Pedro Lopes

Center for Data and Computing (CDAC) Doctoral Fellowship, University of Chicago, 2019–2020

\$2,500 grant for “Health Monitoring Based on Wearable Sweat Sensors,” with Pedro Lopes and Sihong Wang

Biochips Travel Grant, University of Colorado Boulder, 2019

\$500 travel award to attend Biochips Summer School

Daniels Fellowship, University of Chicago, 2019–2020

\$8,000 award for select incoming doctoral students

NASA/OSGC Fellowship, Ohio Space Grant Consortium, 2018–2019

\$16,000 award and tuition waiver for “Design of a miniature actuator based on electrorheological fluid for conveying realistic haptic feedback”

Provost’s Student Academic Achievement Award, Miami University, Fall 2017

Given to select students from the university who have “demonstrated outstanding academic excellence and have made notable contributions to their department.” 10-15 awards per year across entire undergraduate student body.

NASA/OSGC Undergraduate STEM Scholarship, Ohio Space Grant Consortium, 2017–2018

\$3,500 award for “Modeling and Simulation of an Electrorheological Fluid-based Haptic Device”

Undergraduate Research Award, Miami University, Spring 2017

\$720 grant for “Design and Performance Evaluation of a Miniature Haptic Actuator based on Electrorheological Fluids”

NASA/OSGC Undergraduate STEM Scholarship, Ohio Space Grant Consortium, 2016–2017

\$3,500 award for “Application of Electrorheological Fluids for Haptic Feedback”

Redhawk Excellence Scholarship, Miami University, 2014–2018

Scholarship award based on academic achievement and rigor

President’s List, MU College of Engineering and Computing, Spring 2016, 2017, 2018

Semester GPA = 4.00/4.00

Dean’s List, MU College of Engineering and Computing, Fall 2014, 2015, 2016, 2017, Spring 2015

Semester GPA \geq 3.70/4.00

Start the Trend Challenge: First Place, MU College of Engineering and Computing, 2015

Innovation hackathon during Engineers Week with focus on contemporary issues in STEM education

RESEARCH EXPERIENCE

Meta, Reality Labs Research

Haptics Research Scientist Intern

June 2023 – Oct 2023

Redmond, WA

- ▷ Developed a new haptic device (paper in progress), supervised by Priyanshu Agarwal

University of Chicago, Department of Computer Science

Graduate Research Assistant

Aug 2019 – Present

Chicago, IL

- ▷ Investigating unconventional approaches to engineering haptic actuators from the ground up

Miami University, Department of Mechanical Engineering

Under/Graduate Research Assistant

Feb 2016 – May 2019

Oxford, OH

- ▷ Designed, fabricated and tested a combined kinesthetic-tactile actuator based on electrorheological fluids

Korea Advanced Institute of Science and Technology (KAIST)*Visiting Student Researcher*

May 2018 – Aug 2018

Daejeon, South Korea

- ▷ Prototyped a “multicopter-to-mothership” drone docking mechanism, supervised by Prof. Jae-Hung Han in the Smart Systems and Structures Lab: Design and Control

Miami University, Department of Mechanical Engineering*Undergraduate Research Assistant*

Aug 2017 – Dec 2017

Oxford, OH

- ▷ Developed COMSOL multiphysics models of a new induction heating coil geometry for thin sheet workpieces, in collaboration with the Korea Institute of Machinery and Materials (KIMM)

Korea Advanced Institute of Science and Technology (KAIST)*Senior Capstone Research*

Jun 2017 – Jul 2017

Daejeon, South Korea

- ▷ Designed applications for a tablet with novel electrostatic haptic actuators, in collaboration with the Korea Research Institute of Standards and Science (KRISS)

Miami University, Institute for the Environment and Sustainability*Undergraduate Research Assistant*

Jan 2016 – May 2016

Oxford, OH

- ▷ Performed energy policy and engineering research with a focus on university's efforts toward efficiency in buildings under the supervision of Dr. Sarah Dumyahn

TEACHING, MENTORING, AND OUTREACH

Teaching Assistant

Inventing, Engineering and Understanding Interactive Devices (CMSC 23220), University of Chicago Winter 2024

Introduction to Human Computer Interaction (CMSC 20300), University of Chicago Fall 2019, 2021

Dynamic Modeling of Mechanical Systems (MME 311), Miami University Fall 2016, Spring 2017

Mentoring During Ph.D. at UChicagoJacob Serfaty, Undergraduate, *Stick&Slip*Beza Desta, Undergraduate, *ThermalGrasp*Borui Li, Undergraduate, *ThermalRouter*Joyce Passananti, Undergraduate, *ThermalRouter*Daria Shifrina, Undergraduate, *ThermalRouter*Maddie DeVoe, Undergraduate, *Human-Robot Touch***Mentoring During M.S. at Miami University**Jake Zafar, Undergraduate, *Haptics and Flexible Sensors*Adam Coon, Undergraduate, *Magnetorheological Fluid-based Actuators*Sae-Hyun Sone, Undergraduate, *Induction Heating Modeling***Modern Materials Technology**

2019 – 2020

- ▷ Volunteered during the school year to co-teach a materials science course at Lindblom Math and Science Academy
- ▷ Developed lecture slides, handouts, and hands-on labs and demos covering material science fundamentals
